Product Overview

SL350 is a non-thermal aluminium sliding system designed for standard residential and commercial applications.

The system supports:

- Sliding doors and windows
- Double and triple track configurations
- Monorail configurations
- Flyscreen integration

Technical Specifications

System type	Sliding system
System concept	Standard sliding
Thermal behavior	Non-thermal system
Aluminium alloy	EN AW 6063
Profile thickness	Varies by profile
Glazing type	Single and double glazing
Sealing system	Brush seals + gaskets
Surface finish	Powder coating / anodizing

System Options

- Double and triple track systems
- Monorail configuration
- Corner sliding solutions
- Flyscreen integration
- Different interlock widths (25 mm / 30 mm)

Area of Usage

- Residential projects
- Internal partitions
- Low-rise buildings
- Non-conditioned spaces
